## Pelican™ Protector 1510 / 1560 Wheels

We are pleased to announce a significant improvement to the wheels of the Protector 1510 and 1560. The updated wheels enable a wider tread while maintaining the same overall external case dimensions. This enhancement delivers noticeably smoother and quieter rolling performance, along with improved stability, particularly on uneven surfaces. Importantly, these performance gains have been achieved without any meaningful impact to the overall size, form factor, or visual profile of the case.

Affected case models:

- All 1510, -LFC, -LOC, -SC
- All 1560, -LFC, -LOC, -SC

CURRENT

NEW

	Current	New
Wheel Housing Overall Dims (mm)	70.16 x 80.92 x 67.82	74.31 x 81.64 x 67.82
Wheel Housing Weight (grams)	77.1	86.1

Note that the change will not affect the 1510M and 1560M Mobility cases. Furthermore, there are no changes to part numbers or compatibility with existing accessories.
